

How to Make a Volcano Erupt.

Science Experiment - Volcano Eruption

Materials:

- vinegar
- baking powder
- a large spoon
- glass container or volcano paper mache
- baking tray
- Red food colouring

Method:

1. Sit the glass container or volcano paper mache on a baking tray (to avoid making any mess).
2. Add half a glass of vinegar to a glass container or paper mache.
3. Carefully mix in a few drops of red food colouring.
4. Add a large spoon of baking powder to the mix.
5. Watch the volcano erupt.
